## ABSTRACT:

CHG DATE=19990617 STATUS=O>A workplate, a covering plate for domestic appliances in particular, has a plate body (10) equipped with a plate edge (12) which surrounds the body (10) and projects downwards. The body (10) consists of a one-piece moulded plastic part, which is supported by a support device (16) on the underside. The device consists of a grid-like component which is manufactured separately from the plate body (10). The plate body (10) is preferably made of propylene and a plastic film (polyamide or PP) is sprayed on the plate surface.
